Agile Transformation Framework

Ideal for companies eager to transform their mindset and culture to think and act more nimbly to adapt to the ever-changing demands of the market, Nisum's Agile Transformation Framework provides a hands-on, proven approach for flexible and dependable change management of both maturity and scalability of Agile implementations. Using gold-standard methodologies and led by our certified Business Agility experts, this Framework will expedite your company's transition to more a effective, efficient, productive, and engaged workforce.

nisum®

Results you can expect from the Agile Transformation Framework:

4X
Faster
time-to-market

up to **15%**
Lower cost

up to **30%**
Happier and more
motivated teams

up to **50%**
Quality increase
in deliverables

Common Business Challenges:

- Processes within functions/departments are siloed and not scaled at enterprise level
- Lack of uniform methodologies across functions, leading to confusion and inefficiency
- Lack of leadership visibility on team initiatives/progress
- Too much waste with big-bang approaches
- Your organizational structure isn't aligned to your delivery model

How we do it:

- Full-service team of certified Agility experts
- Agile Next Door distributed working model
- Sustainable playbook of proven practices
- Enterprise-level, standardized, measurable transformation

Nisum's Framework Offers:

- A proven, lean approach for change management
- Proven maturity, scalability and distributed model (Agile Next Door®)
- Improvement of the company's capacity to respond fast to market changes
- Self-sustaining transformation lasting after Framework implementation
